

# Q PLATINUM™ SERIES

Q3 PLATINUM™ - Q4 PLATINUM™ - Q5 PLATINUM™

The Q-Series is the ultimate system for the professional refinisher from cabinets and furniture to automotive and marine products. The patented noise reduction technology coupled with the custom-designed and patented fan pattern controller makes the Q-Series stand out in the industry.

The Q-Series is the absolute tool for power and control, allowing you to work smarter, not harder, and to focus on what really matters - the quality of your work.

## WHAT MAKES THIS SERIES DIFFERENT

- “Q” is for quiet - the quietest turbine on the market
- Convenient fan pattern adjustment at your finger tips
- Can be used with a range of materials (thin to thick viscosity)
- Ideal for waterborne and solvent-based coatings
- Quick change filter - easy to clean and swap-out in seconds
- 2-year warranty on parts and labor

## KEY FEATURES

- U.S. Patented Noise Reduction Technology - turbine noise levels are reduced by over 50%
- Heat Dissipation Chamber™ allows for much cooler operating temperatures
- The only turbine spray gun with a U.S. Patented Side-mounted Fan Pattern Control™
- Non-bleed turbine spray gun - choice of 3 different turbine spray guns
- Stainless steel nozzle and needle
- PSI range of 6.5 to 9.5
- Cup capacity of 89cc (3oz) to 1000cc
- Metal turbine case
- Quick-change filters
- High transfer efficiency
